15 *Counsel for Defendant Meta Platforms, Inc.*

16 **UNITED STATES DISTRICT COURT**
17 **NORTHERN DISTRICT OF CALIFORNIA**

18 RICHARD KADREY, et al.,
19 Individual and Representative Plaintiffs,
20
21 v.
22 META PLATFORMS, INC., a Delaware
corporation;
23 Defendant.
24

Case No. 3:23-cv-03417-VC

**DEFENDANT META PLATFORMS, INC.'S
FIRST SUPPLEMENTAL RESPONSES AND
OBJECTIONS TO PLAINTIFFS' FIRST SET OF
INTERROGATORIES**

Trial Date: None
Date Action Filed: July 7, 2023

1 **17.** In responding to all Interrogatories, Meta will comply with the requirements of the
2 Federal Rules of Evidence and Federal Rule of Civil Procedure 26.

3 **III. OBJECTIONS AND RESPONSES TO INDIVIDUAL INTERROGATORIES**

4 **INTERROGATORY NO. 1:**

5 Describe in detail the data You have used to train or otherwise develop the Meta Language
6 Models, Including, for each:

7 a. How You obtained the data, e.g., by scraping the data, purchasing it from third
8 parties, or by other means;

9 b. All sources of Data, including any third parties that provided data sets;

10 c. To the extent the data was derived from publicly available websites, a list of all such
11 websites and, for each, the percentage of the data corpus that is derived from that website;

12 d. The categories of content included in the data and the extent to which each category
13 is represented in the data corpus (i.e., as a percentage of data used to train the model);

14 e. All policies and procedures Related to identifying, assessing, vetting and selecting
15 sources of data for the model.

16 **RESPONSE TO INTERROGATORY NO. 1:**

17 Meta incorporates by reference its objections and definitions above, including to the terms
18 “You” and “Meta Language Models.” Meta further notes that the capitalized term “Related” is not
19 defined; Meta construes that term coextensively with “concerning.”

20 As an initial matter, Meta objects to this Interrogatory because it consists of multiple,
21 separate Interrogatories, each which count toward Plaintiffs’ limit under the Federal Rules. For
22 example, the question about what data used to train a model is separate from how it was obtained,
23 and further, subparts (d) and (e) are not subsumed within and necessarily related to the primary
24 question, and purport to require a calculation of percentages of data, and separate identification of
25 “policies” and “procedures” for (1) identifying, (2) assessing, (3) vetting, and (4) selecting data.
26 This Interrogatory consists of *at least* three Interrogatories, and depending on how it is interpreted,
27 many more. In answering the Interrogatory, Meta does not waive this objection.
28

1 Meta objects to this Interrogatory because, on its face, it does not exclude legal advice or
2 opinions, which are subject to attorney-client privilege and/or attorney work product doctrine, in
3 particular as to subpart (e). Meta will not produce privileged materials or attorney work product.

4 Meta objects to this Interrogatory as vague and ambiguous as to the term “data,” which is
5 undefined. Meta will construe “data” to mean Training Data (as construed above).

6 Meta objects to this Interrogatory as vague, ambiguous, and unintelligible as to “percentage
7 of that data corpus that is derived from that website” because “data corpus” is undefined, and Meta
8 is accordingly unable to interpret and respond to subpart (c). Even if “data corpus” were defined,
9 the subject matter of subpart (c) would be overbroad, unduly burdensome, and disproportionate to
10 the needs of the case and seeks information that is not relevant to the parties’ claims and defenses.
11 Meta will not respond to subpart (c).

12 Meta objects to the undefined phrase “categories of content, which is vague, ambiguous,
13 and unintelligible.

14 Meta objects to this Interrogatory to the extent that it seeks information that is not within
15 Meta’s possession, custody, or control.

16 Subject to and without waiving the foregoing objections, and pursuant to the terms of the
17 Protective Order and the ESI Order, Meta responds as follows: Meta incorporates by reference the
18 identification of datasets used to train Llama 1 that is included in the publicly available paper
19 “LLaMA: Open and Efficient Foundation Language Models.” Such datasets were used to train
20 Llama 1. Meta will produce a copy of that paper in its forthcoming production pursuant to Rule
21 33(d).

22 Meta will conduct a reasonable search for additional non-privileged information or, in
23 accordance with Rule 33(d), documents in Meta’s possession, custody, or control, sufficient to
24 show any other datasets used to train the Meta Language Models (as construed above), as well as
25 policies and procedures for identifying, assessing, vetting, and selecting sources of data for those
26 models.

27 Discovery is ongoing and Meta will also supplement its response to this Interrogatory to
28 identify the sources of such datasets and general categories of data within them, to the extent that

1 such information is within Meta's possession, custody, or control.

2 Discovery is continuing and Meta reserves the right to supplement or amend its response at
3 a later time.

4 **Meta's First Supplemental Response to Interrogatory No. 1:**

5 Subject to and without waiving the foregoing objections, and pursuant to the terms of the
6 Protective Order, Meta responds as follows.

INTERROGATORY NO. 2:

Describe in detail the RLHF process for each Meta Language Model. Include in Your response:

- a. Examples of types of experts who write questions and answers for use in RLHF;
- b. Examples of questions and answers;
- c. An explanation of the rating system or method of evaluation for the Meta Language Model's responses;
- d. A description of the RLHF You actually undertook in order to correct or remediate any Meta Language Model's propensity to emit protected expression from its Training Data.

RESPONSE TO INTERROGATORY NO. 2:

Meta incorporates by reference its objections and definitions above, including to the terms "Meta Language Model," "You," and "Your."

As an initial matter, Meta objects to this Interrogatory because it consists of multiple, separate Interrogatories, each which count toward Plaintiffs' limit under the Federal Rules. For example, the question about the RLHF process is separate from subpart (b), which asks for "examples of questions answers" or subpart (c) which asks for a description of a rating system. Moreover, subpart (d) asks about steps taken to "correct or remediate" *any* language model's "propensity" to emit "protected expression," which is a separate inquiry altogether. This Interrogatory consists of *at least* three Interrogatories. In answering the Interrogatory, Meta does not waive this objection.

Meta objects to this Interrogatory as vague and ambiguous as to "examples of types of experts." Meta will construe this phrase to refer to examples of the general background of

responsibility for the planning, conception, design, programming, testing, or operation of Llama 1.

Meta's First Supplemental Response to Interrogatory No. 12:

This response is designated as Highly Confidential – Attorney's Eyes Only under the Protective Order.

Subject to and without waiving the foregoing objections, and pursuant to the terms of the Protective Order, Meta incorporates herein its Supplemental and Amended Response to Interrogatory No. 7.

Meta has produced a copy of "Llama 2: Open Foundation and Fine-Tuned Chat Models" as Bates No. Meta_Kadrey_00000001- Meta_Kadrey_00000077. Pursuant to Rule 33(d), Meta also refers Plaintiffs to the paper titled "The Llama 3 Herd of Models," published by Meta on July 23, 2024, for further information.
